

Having a Puppy from Us

Lilleagle Beagles
5 Star Home Boarding Licence
from Warwick District Council
AB91/26

Lilleagle Beagles
5 Star Dog Breeding Licence
from Warwick District Council
DB11/26

Your puppy will be:

- **Kennel Club Registered from parents that have been health tested** to ensure pups are not affected with any known hereditary diseases. You will have copies of their parents' KC pedigree, their health test results, you can purchase your puppy's full pedigree from the Kennel Club when transferring them into your name.
- **Endorsed with the two Kennel Club endorsements**, this is to protect the breeding line of the dog and to ensure only those of the highest quality, temperament and standard are bred from. If you wish to breed from your dog or show your dog, you will need to seek permission from me. Breeding/showing prospects can be discussed early on, but remember I sell pet dogs, we cannot tell how your dog will develop until s/he's developed and so an appraisal of your dog and yourself will be carried out prior to any endorsements being lifted.
- **Checked by a vet for health**, at birth and at 7 weeks, **wormed** regularly and had a **first vaccination** (puppies whose vets use a different manufacturer of vaccinations from our vets to discuss further, we may be able to use a compatible vaccine.
- **Microchipped** transferred into your name prior to taking your pup away, come with Kennel Club initial insurance.
- **Socialised** and **Habituated** in the family home and come with a puppy pack and contract with detailed information as to his/her progress that you can continue with.

You will:

- **Understand that puppies have interests that are independent to ours**. Whilst you will have chosen a puppy, watching them grow up, sometimes a puppy's personality may not be suited to you or your circumstances / environment, if this is the case I will talk to you and discuss a puppy more suited to your lifestyle and needs.
- Be provided with a take home bag, including plenty of the feed they have been raised on.
- **Be an active member in the group whats app chat** to keep fully informed of your puppy's progress and get tips before bringing your puppy home.

We ask:

- That you **stay in contact with us** and ask for help whenever you need it. Please keep us informed of any changes in circumstances that will affect your dog, ie, change of address.
- **Return the puppy to us at any stage** of their life if your circumstances change for whatever reason, no judgements made, we will then find a suitable home and donate the rehoming fee to Beagle Welfare. We can also provide respite if a change of circumstance is temporary.
- Always ensure your dog has **access to a garden**.
- **Follow your contract** and ensure your puppy is well loved, socialised and looked after.
- **Feed a quality diet** –we will recommend whatever best suits your puppy.
- That you **research** all you can on beagles and their traits. They are loving, wonderful dogs, with a huge personality, which demands a person who has a sense of humour and patience.
- That you think about how you will prepare your dog for **separation** and being left alone especially when new owners return to work after a period of being home, whether that be school holidays, initial settling in period etc.
- That you **read through our website**, the **contract** and **any information** we send you and ask any questions you have.
- That you locate a **local vets that have a 24/7** provision and consider a health plan to have regularly preventative care.
- That you **do not use any adverse training methods** and follow the law in relation to keeping, owning and welfare of dogs.

Whilst we endeavour to release puppies to their new owner after eight weeks, there are times, for the benefit of their welfare that we hold pups back until we are happy with their progress. If this happens you will be informed throughout the process. If your pup visits the vet other than for a health check whilst s/he is with us, you will be informed and advised of any treatment and progress.

All new pup owners will join the whats app group for their litter where you have access regular group updates.

Puppy Costings. 2026 Prices increased by £400 max (First increase since 2020 due to increased costs)

Our pups are costed at £2400 . You may find cheaper, however please do your research, a puppy from me will be healthy, **stress tested and stress tolerances developed**, brought up around the family, **socialised and habituated** to many daily noises, smells and experiences.

They will be provided with plenty of **sensory stimulation**, encouraged to toilet appropriately (every pup has their strengths and weakness), have **24/7 supervision throughout their time here**, have no cost spared and most importantly come to you with a promise that **I will support you the whole way through the journey**. They are not kennel reared dogs and so when they come home can be much easier to transition.

This costing can be simplified as:

- Pregnancy costs to include; health check, stud, progesterone testing, Ht42d and puppy feed prior to birth, Daily worming from 42 days gestation, renewed whelping supplies, and pregnancy scan - £1900. (assuming six puppies are reared that's **£300**, per pup)
- General birthing costs per pup, **£200**.
- Injections, microchips and two vets visits / health checks per pup, Kennel Club registration **£300**.

This leaves £1600 to cover the following:

- 24/7 qualified care over 56 days whilst your puppy is here with us.
- All socialisation and habituation requirements to ensure the best start for your puppy, including vehicles, children, cats, fireworks, music, household appliances, outside play, strangers, toys, the list is endless.
- All five star licencing requirements and Kennel club requirements adhered to and more.
- Feeding daily, this covers the mum (usually costs £10 per day for increased milk production for four weeks minimum) and mother starter feed, then puppy any supplements and treats for pups when weaning and rearing.
- Wormed three times over three days for each course and any other medical care required.
- My time spent with you, 1-1 visits, group visits.

So that is **£29 per day - just over £1 per hour for 24/7 care** (cheaper than a boarding kennel!), this means I can pay a member of staff to walk my other dogs whilst I care for your pups and their mother.

I like to be transparent with everything I do with you, from care of your pups to costs so that you completely understand that this is done for you, there is no money in this. This doesn't include the yearly costs for looking after the mother during the year, inbetween litters or the lifetime support you will get with your pup.

If you wish to secure a pup you will need to provide a deposit. The number of pups available will reduce as deposits are received, some people will provide deposits prior to birth, some after, this is your decision to make – you are protected in as much as if I don't have a puppy for you for whatever reason then your deposit is returned.

From this point, we will have discussions as to which pups are available and your preferences taking into account my professional expertise as to which pup is most suitable. Pups will be allocated and offered in order of deposits received, usually a week or two after birth, once I am happy that pups will survive and are healthy.

The deposit is £500. It is non-refundable if you decide you wish to withdraw from having a pup. If for any reason, I withdraw from the sale for whatever reason, ie a pup is not available, the deposit will be refunded in full. You will be provided with a signed deposit receipt for HMRC purposes, which details the above.

Puppies can then be paid for in two ways, by prior agreement, either by a payment plan prior to collection or in full on collection. Please let me know which route works for you and we can create the plan for your puppy.

I have created a wish list on Amazon – you don't need to purchase from Amazon, there are cheaper places for some things and many things can be purchased second hand and sanitised before use. But hopefully the list is a good starter for you. If you're struggling to purchase something, please borrow some of my gear! We also hold a new to your sale with each litter as previous pawrents send back their equipment for reselling.

You can also find a lot of things on facebook market place - you don't need to buy brand new!
